

How Was It?

Future Test Tips

- Always try something, even if you know it's wrong
- Attempt the extra credit. Correct is a full letter grade; wrong may still be half a letter!

MS Access

- As the semester progresses, Access causes more trouble than necessary for basic SQL concepts
- I will still accept assignments in Access, but will not be spending the unreasonable amount of class time to support it in lecture
- Video for setting up SQLite will be on the course website

Moving From Access

- Table names no longer need 'dbo_' in the beginning
- Multiple joins do not need extra parentheses
- Wildcards will now be '%' instead of '*'

Schedule Changes

- Lectures will always be on Monday
- Labs will always be on Wednesday, except on Test weeks
- End of October (Monday 10/29), I will be out of town. That week will have a lab on Monday & lecture on Wednesday
