

Unit 7 Review & Project

Ryan Nixon

Your Tests

- Lowest score: **30.0** (4 less than 70 points)
 - Did not attempt many problems
 - Did not attempt extra credit
- Highest score: **106.0**
- Average score: **83.38**

Ungraded Assignments

- Due to a surprising lack of time & internet access I had to prioritize tests over the last few assignments turned in. The following students have ungraded work that I will get to as soon possible
- Zachary Byrd, James Eaches, Dale Patrick Jr., Vanessa Berther, Kayla Teslow, Connor Younce, Walker Burgett, Casey Lovelace
- If anyone not on this list is missing assignment grades on Blackboard, please tell me

Unit 7

- Who tried the assignment on Monday? Any questions?
- Quick review of set operations
- A few examples

This Monday

- Vote -- Who would like to skip Unit 8 and replace it with a review/preview lecture?
- **Pro:** You will have a better understanding of all that we have learned and what is coming
- **Con:** The associated assignment and test questions will apply to your individual SQL project rather than correlated subqueries

Individual SQL Project

- Information is all on the website
- By now you should have an idea of what you are going to make
- You should also know if you are going to group with other students. Groups may be as large as 4 people

Individual SQL Project

- What ideas have you come up with so far?
- Let's diagram!

Reminders

- Lecture next Monday in classroom
- No assignment today; Unit 7 assignment due 11/19
